AI Business Recommendations

1. Increase focus on keyboards and headphones, as they have the highest gross margins (51.11% and 46.67%), which can improve overall profitability if sales volumes grow.

2. Analyze laptop pricing or cost structure due to its low gross margin (27.06%) despite the highest revenue, to improve its gross profit dollars or reduce costs.

3. Consider marketing or bundling strategies for products like desks and monitors with lower margins (34.38% and 32.00%) but moderate sales, to increase sales volume and overall gross profit dollars.
